2026 PC GAME CRASH, GPU DUMP & HANG ERROR FIX TOOLKIT

# Unreal/DX12 GPU Crash Dump Fix, TDR Timeout Registry Patch Guide, and Shader Cache Reset Playbook.

PC CRASH & GPU DUMP FIX

## 1. Fixing GPU Crash Dumps Without Reinstalling Windows

90% of Unreal Engine and DX12 crashes are caused by Windows resetting the GPU driver after 2 seconds (TDR) or corrupted shader caches.

Follow the 5-step registry and launch-option checklist to stabilize frame times.
